### CAN YOU GUESS.

Here's a Chance to Make  
Ten Dollars Easy.

All You Have to Do Is to Pick the  
Winners in the Coming  
Primary.

Just for the interest attached to a guessing contest, and to put a little more interest into the coming campaign for County officers, THE NEWS will give its readers a chance to make ten dollars and have a little fun at guessing on the side.

To the person making the first nearest correct guess of the winners in the Democratic Primary Election which will be held in this county on Saturday, June 1st, 1901, THE NEWS will present a ten dollar gold piece. The conditions of the contest are simple. Old subscribers and new subscribers who pay \$2 on their subscriptions will each be entitled to a guess, and to as many guesses as they pay year subscription. If no one guesses correctly, the first one who guesses the closest to all the winners will receive the ten dollars.

You intend to pay your subscription anyway, and you may as well pay before the first day of June and have a chance of getting your money back, besides gaining the distinction of knowing more about the political situation than your neighbors.

Each guess will be registered when received as to the exact day, hour and minute. No one will be permitted to see how any one else has guessed. In guessing only the offices on the ballot are to be considered.

### HINTS FOR FARMERS

**Lawn Grass.**  
While most of the seed stores sell special lawn grass mixtures which purport to contain a half dozen or more varieties of grass seeds, we doubt if any of them will give better results than to mix one bushel of Kentucky blue grass, a half bushel of clean redtop or a bushel in the chaff, one peck of sweet vernal and one pound of white clover, the above being amount for one acre. The blue grass is earlier than the redtop, and the redtop resists summer heat better, while the fragrant, sweet vernal is good both early and late. Have the ground thoroughly pulverized and sowed rich with about 200 pounds lawn dressing per acre, which has more nitrogen and potash than the usual superphosphates, and sow in spring as early as the ground can be well worked or sow in August. We prefer the artificial fertilizer to the barnyard manure for lawn as being free from weed seeds. The above mixture is also a good one for permanent pasture.

**Killing Brush.**  
We see much said in our western exchanges about the value of the Angora goat to destroy brush, says American Cultivator. If that is their strong point, we do not want them. It used to be the fashion to advocate keeping sheep to kill weeds and briars. They will surely do that if kept on them, but we never knew any one to start with sheep with that as his main incentive who did not come to the conclusion that there was no profit in sheep. If we want good wool and mutton, the sheep must have something besides briars to feed upon, and if they choose to take a few briars or weeds as a sort of condiment with the other food well and good. So we think if Angora goats are kept to kill brush entirely they will flourish but little mutton and a poor flesh. Give us the old plan for killing brush, mow in July, burn in August and then let sheep pick a few of the tender sprouts if they want them the next spring.

**Hand or Machine Labor.**  
There are many kinds of work upon the farm which if performed by hand labor require much strength and which can be done equally well when the machine is used. Give us the old plan for killing brush, mow in July, burn in August and then let sheep pick a few of the tender sprouts if they want them the next spring.

**Best Breed of Cows.**  
Which is the best breed? That's easy, says O. A. Seaton in Kansas Farmer. Some one has already answered that and said, "The breed you like best is best for you." But if you wish my opinion I would say the Jersey for cream, the Holstein for milk, the Hereford for beef and the Shorthorn for all three—milk, butter and beef.

**Pruning Fruit Trees.**  
March and April are often favorable months for pruning fruit trees, especially such as have been so well cared for that there are only some superfluous branches of last year's growth to be taken off where they crowd or are growing across one another. But the experience in pruning in California advances another idea in regard to spring pruning. They say that of four peach trees, two of which were winter pruned and then the fruit thinned and the other two that were spring pruned after the buds had set, the latter bore the most peaches, and they were very much larger. If this is true, we do not know why the same principle may not hold good with other fruits.

**Brakes or Ferns.**  
How many farmers know that the ordinary small fern which we call in New England the "pasture brake" makes as good hay as clover or if not quite that much better than the swale grass among which it grows? It is a fact, or the cows show poor judgment. Let them get to a lot of it or put it down as bedding, and they will pick it out greedily. Now, we do not advise any one to grow ferns for cattle feeding, but do not condemn swale hay because it has a lot of fern in it, as they are the best of the hay. Sheep also are extremely fond of this kind of hay, and all kinds of stock seem to thrive on it.

**Lined Oil Cake.**  
It is an English tradition that something like a century ago a farmer used the refuse from a linned or flaxseed oil mill to manure a field and then turned sheep on it. Going there awhile afterward, he found that the sheep had eaten the grass and the cake as well and had made a better growth than those in other fields. This is said to have been the beginning of feeding linned cake to sheep. Possibly it is true, for some of our most beneficial discoveries have been made in ways as accidental or providential as this.

**Benefits of Cultivation.**  
It has been demonstrated that the poorest land in the country may be made to produce profitable crops simply by scientific cultivation and without the use of fertilizers.

### FOR THE HOUSEWIFE

**Serving Vegetables.**  
Considering the mass of information concerning cookery which is offered us in cheap editions, there is little or no excuse for young wives to give their husbands cause to complain of sameness in their meals, even in the most economical households.  
In parts of Europe it is a general custom to serve vegetables not only as accompaniments to the joints and entrees, but as separate dishes, to be enjoyed by themselves. For instance, a cauliflower masked with white sauce and perhaps scattered over with grated Parmesan is a favorite dish. Another vegetable course consists of tomatoes nicely browned with bread crumbs. Fried parsnips may also occupy a place to themselves in the menu, and potato balls are also good.  
There are endless delicious dishes to be made from vegetables only or with the addition of rice and brown or white sauce. Haricots and butter beans served with a pie crust are most appetizing. We make a great mistake in failing to serve vegetables as a course and to appreciate them for all they are worth, and we should do well to follow continental custom in regard to the making up of simple, appetizing entrees from vegetables solely. One hardly realizes how many dainty and savory dishes can be concocted without the aid of meat.—Philadelphia Ledger.

**Glove For Household Use.**  
Here is a woman's invention that should prove practical for the purpose for which it was designed—namely, to protect the fingers when kneading dough or applying any polishing substance to stoves, woodwork, furniture, etc. It consists of a set of finger tips of rubber or any other flexible material suspended by elastic cords from a wristband. These tips are preferably larger than the average sized finger and are adapted to be gathered at the

ends by means of the strings passing through the eyelets, as shown. Herein are various devices have been made in the form of gloves for polishing purposes, but in all the others the serious objection has been the tendency of the hands to perspire within the gloves, causing great inconvenience to the user. This objection is obviated by the new glove, as it does not entirely enclose the hand, but affords only a covering for the fingers, leaving the rest of the hand free to the atmosphere. The patent for this invention has been granted to Annie T. Rogers of New York city.

**Pictures in the Home.**  
When we enter a home, among the first things to attract our attention are the pictures, and from them we can read the taste or lack of it of the lady of the house, for they give us the keynote to her character. If we find gaudy chromes and cheap oil paintings massed together, we know at once that refinement is lacking in that home. Pictures should be selected always with an eye to the surroundings in which they will be placed. If the house is very large and handsome and money of no consideration, then of course oil paintings by the best artists are preferable. People of moderate incomes who wish tasteful homes should choose water colors, engravings or etchings if they can be afforded. Artists' signed proofs are most desirable, but no better than good copies, with the exception of the signature, which is supposed to add value.—Maude C. Murray-Miller in Woman's Home Companion.

**Body Brussels Rugs.**  
For a cheap rug nothing is so serviceable as a body brussels. We have a large piece that has been in constant use for 10 years and does not show a bare spot. It has been in the hall, dining room, a bedroom and is now on the middle of the sitting room floor. A thorough washing with wool soap did not seem to dim a color. We have a large lot, so its wearing qualities have been well tested. Brussels is firm and heavy enough to be flat, so that it does not need the frequent spreading out that is required for an Ingrain or Smyrna.—Good Housekeeping.

**Dainties to Serve With Tea.**  
Dainty orange wafers are exceedingly nice to pass with tea. A ginger or cinnamon wafer should be served with chocolate and a plain unfavored one with coffee. You may, if you like, pass some little bonbons, like chocolate wafers, but you should not have any other refreshments at an afternoon tea. Remember that in these days elegance tends toward simplicity.—Ladies' Home Journal.

**When Cakes Stick to the Griddle.**  
A point to remember in baking cakes is that salt will remedy a tendency to stick. If the cakes adhere to the griddle while baking, grease the griddle well, sprinkle salt on it, rub it thoroughly with a dry cloth, then grease it and try again.

**A Gentle Hint.**  
In our style of climate, with its sudden changes of temperature,—rain, wind and sunshine often intermingled in a single day,—it is no wonder that our children, friends and relatives are so frequently taken from us by neglected colds, half the deaths resulting directly from this cause. A bottle of Boschee's German Syrup kept about your home for immediate use will prevent serious sickness, a large doctor's bill, and perhaps death, by the use of three or four doses. For Croup, Consumption, Hemorrhages, Pneumonia, Severe Coughs, Croup, or any disease of the Throat or Lungs, its success is simply wonderful, as your druggist will tell you. Pure Brown Leghorns and Silver Wyandottes, fourteen for one dollar. Apply to Mrs. T. Porter Smith, Paris, Ky.

Mr. J. W. Patterson, night police at Nashville, la., says: "In January I had a very bad cold on my lungs, and used half dozen different cough medicines and prescriptions from two doctors, but grew worse all the time. I finally bought a bottle of Foley's Honey and Tar and after using two-thirds of it I was entirely cured." Clark & Kenney

**How It Is Done.**  
The first object in life with the American people is to "get rich"; the second, how to retain good health. The first can be obtained by energy, honesty and saving; the second (good health) by using Green's August Flower. Should you be a despondent sufferer from any of the effects of Dyspepsia, Liver Complaint, Indigestion, etc., such as Sick Headache, Palpitation of the Heart, Sour Stomach, Habitual Constipation, Dizziness of the Head, Nervous Prostration, Low Spirits, etc., you need not suffer another day. Two doses of the well-known August Flower will relieve you at once. Go to W. T. Brooks, Paris, Ky., and get a sample bottle free. Regular size, 75 cts. Get Green's Prize Almanac.
